Subject: Consulting Help with Ground Water Investigation
[Draft Scope of Van Kirk Work.docx](#)

Bob, Jerimiah and myself have discussed the heavy workload being placed on our staffs as well as the benefits of having an outside independent expert taking a look at our work and process. I have prior experience with Dr. Craig Van Kirk, Professor Emeritus at the Colorado School of Mines and a petroleum engineer, to see if he would be interested in providing some assistance to our working group. He appears to be well suited to help us and I have drafted a scope of work and that is attached for your review.

Please look this over and plan on some discussion during our call this week.
